BEFORE THE FIRST LESSON

The first lesson is 21 November (Saturday group) or 22 November (Sunday group). Have this list ready by then. It takes about 30 minutes in all, and it means we start working straight away in class.

ABOUT 30 MINUTES IN ALL

01

A COMPUTER

A macOS or Windows laptop where you can install programs. A phone or tablet is not enough.

02

A GOOGLE ACCOUNT

NotebookLM, Gemini and Google Sheets open through this account. If you already have one, you do not need a new one.

03

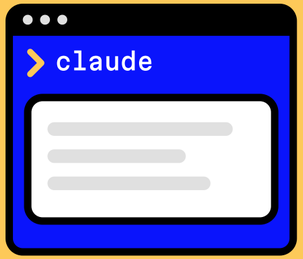

CLAUDE SUBSCRIPTION

The main tool of the practicum. You need at least the Pro plan, and we recommend Max from Lesson 03.

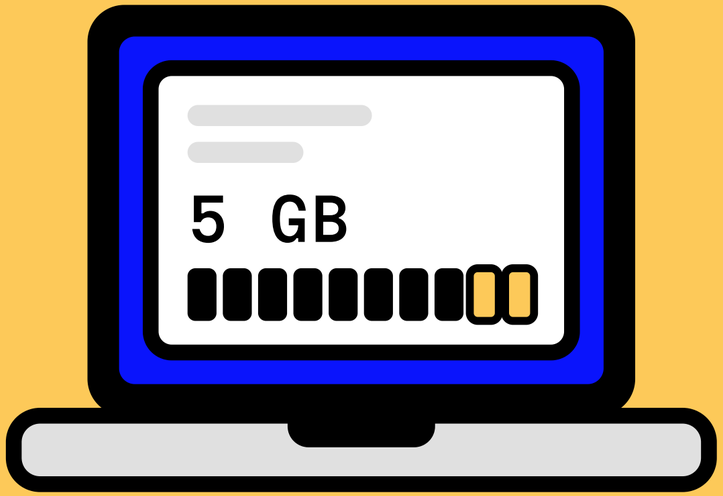

04

WARP AND CLAUDE CODE

Claude Code runs in the Warp terminal. Install it and open it once.

01

A COMPUTER

A macOS or Windows laptop where you can install programs. A phone or tablet is not enough.

1. Bring your own laptop to the lessons. The whole practicum is hands-on.
2. Check that you have admin rights: you need to install programs. If it is a work computer, ask your IT team.
3. Keep at least 5 GB of free disk space.
4. Bring the power adapter too.

02

A GOOGLE ACCOUNT

NotebookLM, Gemini and Google Sheets open through this account. If you already have one, you do not need a new one.

1. Open accounts.google.com/signup.
2. Enter your first name, last name and a new email address.
3. Confirm your phone number. A code arrives by SMS.
4. Write the password down: you will need it in class.

Create a Google account `accounts.google.com/signup`

03

CLAUDE SUBSCRIPTION

The main tool of the practicum. You need at least the Pro plan, and we recommend Max from Lesson 03.

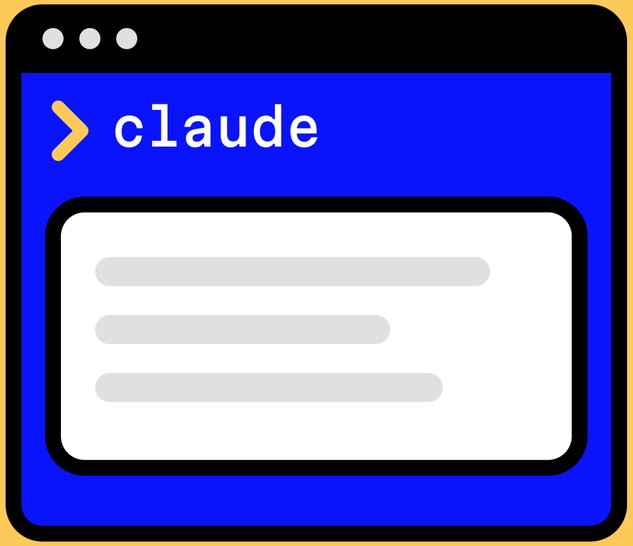

1. Go to claude.ai and sign up with "Continue with Google".
2. In Settings → Billing choose the Pro plan. It costs $20 a month.
3. Pay with an international Visa or Mastercard. The card needs a dollar balance and online payments switched on. Uzcard and Humo do not work.
4. Install the Claude app from claude.ai/download and sign in with the same account.

Download the Claude app `claude.ai/download`

Create an account on claude.ai `claude.ai`

FROM LESSON 03 YOU USE CLAUDE CODE A LOT, AND THE PRO LIMIT CAN RUN OUT FAST. THEN SWITCH TO MAX (FROM $100 A MONTH).

04

WARP AND CLAUDE CODE

Claude Code runs in the Warp terminal. Install it and open it once.

1. Download Warp from warp.dev and install it.
2. Mac: open Warp and type:
   `curl -fsSL https://claude.ai/install.sh | bash`
3. Windows: open Warp and type:
   `irm https://claude.ai/install.ps1 | iex`
4. Type claude and press Enter. A browser opens: sign in with your Claude account.
5. If Claude Code answers your greeting, you are ready.

Download Warp — www.warp.dev

Claude Code guide — code.claude.com/docs/en/quickstart

IF THE INSTALL FAILS, SEND A SCREENSHOT OF THE ERROR TO YOUR MENTOR. MENTORS HELP AT THE END OF LESSON 01.
